Product introduction

For CKD twin rod cylinder STR2-M, STR2-B series, two single rod cylinders are jointed in parallel.
Double accurate revolvable angle tolerance and double cylinder thrust are realized. This series provides 6 types of bore size from 6 to 32 mm, with wide option and variation.

Pneumatic Components

Safety Precautions

Always read before starting use

Refer to Intro 45 for general details on the cylinder, and to Intro 52 for details on the cylinder switch.

Twin rod cylinder STR2 Series

⚠ CAUTION

Design & Selection

1 Precautions for fine speed type (STR2-F)

- **Use with oil-free specifications.**

Features may change if the device is lubricated.

- **Assemble the flow control valve near the cylinder.**

Adjustments become unstable if assembled away from the cylinder.

Use the SC-M3/M5, SC3W, SCD-M3/M5, or SC3WU Series flow control valve.

- **Generally, the higher air pressure, and the smaller load result in the more stable operation.**

Use a load at 50% or less.

- **Do not apply a lateral load on the cylinder. Install the cylinder so the sliding guide is not twisted.**

Operation may become unstable due to fluctuations in load and resistance.

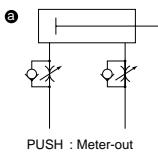

Operation of a guide having a large difference in static and dynamic friction may become unstable.

- **Avoid use with vibration.**

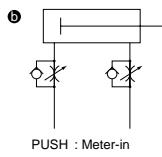

The product will be adversely affected by vibration and operation will become unstable.

- **Stable speed control is achieved with a meter-out circuit.**

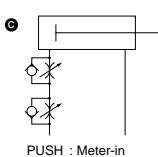

When driving the single rod cylinder at fine speed with the operation direction set to PUSH, popping out may occur if operation is started when load resistance is small. As a corrective action, use a (b), (c), or (d) circuit. Note that the (d) circuit is the most stable.

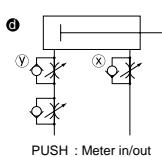

PUSH : Meter-out
PULL : Meter-out

PUSH : Meter-in
PULL : Meter-in

PUSH : Meter-in
PULL : Meter-out

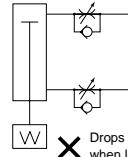

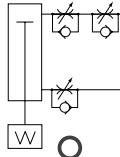

PUSH : Meter in/out
PULL : Meter-out

Adjusting speed for (d) circuit PUSH operation

1. Set the speed with the x flow control valve.
2. Lower the flow rate with the y flow control valve until popping out no longer occurs.
3. Reconfirm speed.

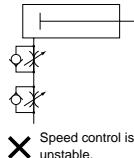

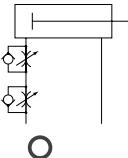

Note 1: When circuits (b), (c), and (d) are compared, (d) circuit operation is most stable.

Note 2: When installed vertically, the unit will drop naturally if the meter-in circuit is used. Use the meter-out circuit in this case.

X Drops naturally when lowering.

Note 3: Connect the flow control valve in parallel with the following circuit:

X Speed control is unstable.

(Cause of popping out)

- The meter-out circuit slows the flow so fine speed is attained on the exhaust side, so both sides reach the same pressure immediately after the valve is changed and the thrust of the piston pressurized area difference functions in the PUSH direction, causing popping out.

(Guide for popping out occurrence)

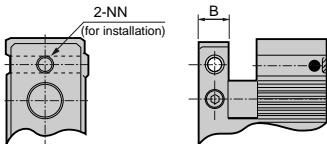

- Popping out occurs when the piston rod area X air pressure > load resistance.

CAUTION**Installation & Adjustment****Piping**

- 1** The twin rod cylinder has piping ports at 2 positions each for the movement direction. Change the position of the plug based on actual use.
After making any changes, check that no air leaks from the plug section.

Installation

- 1** Check that no dents or scratches are made on main tubing installation or end plates that may adversely affect flatness.
Flatness on the counterpart onto which the end plate is installed must be 0.05 mm or less.
- 2** When using the screw hole NN on the end plate, check that the bolt length is equivalent to the B dimension.
Failure to observe this may damage the end plate.

Bore size (mm)	B dimensions
6 dia.	6
10 dia.	6
16 dia.	8
20 dia.	10
25 dia.	12
32 dia.	12

- 3** A rubber cushion is used. The following table shows kinetic energy absorbed by the cushion. If the energy exceeds these values, consider using another shock absorber.

Bore size (mm)	Allowable energy absorption J	
	PUSH	PULL
6 dia.	0.008	0.059
10 dia.	0.061	0.083
16 dia.	0.181	0.083
20 dia.	0.303	0.127
25 dia.	0.68	0.237
32 dia.	1.3	0.311

Pneumatic Components

Safety Precautions

Always read before starting use

Refer to Intro 45 for general details on the cylinder, and to Intro 52 for details on the cylinder switch.

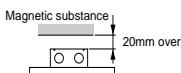

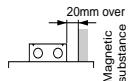

Twin rod cylinder STR2 Series

⚠ CAUTION

Installation & Adjustment

4 Precautions for cylinders with switches

- The reed switch cannot be used with STR2-B-6 or 10 types.
- STR2-B-6s with proximity switches must not be installed on a magnetic body such as a steel plate, or the switch may malfunction.
- The cylinder may malfunction if a magnetic substance, such as a steel plate, is nearby. Move the magnetic substance to at least 20 mm from the cylinder. (Same clearance for all diameters)

- If cylinders are installed adjacently, the cylinder switch may malfunction. Separate cylinders by the following distances.

Adjacent conditions		Switch type	6 dia.	10 dia.	16 dia.	20 dia.	25 dia.	32 dia.
2 cylinders in parallel	Lateral Switch	A	K2, K3	43	45	56	66	75
			K0, K5	40 ^{*1}	47 ^{*1}	62	81	85
	Vertical Install switch at side of adjacent cylinder	A	K2, K3	7	1	2	4	3
			K0, K5	4 ^{*1}	3 ^{*1}	8	19	12
	Vertical Install the switch on the opposite side of the cylinder at the side	A	K2, K3	28	27	36	47	47
			K0, K5	27 ^{*1}	26 ^{*1}	36	53	53
		B	K2, K3	15	12	15	20	14
			K0, K5	14 ^{*1}	11 ^{*1}	15	26	20
3 or more cylinders in parallel	Lateral	A	K2, K3	19	16	22	28	34
			K0, K5	14 ^{*1}	16 ^{*1}	22	33	34
		B	K2, K3	6	1	1	1	1
			K0, K5	1 ^{*1}	1 ^{*1}	1	6	1
	Vertical	A	K2, K3	44	45	57	67	77
			K0, K5	41 ^{*1}	47 ^{*1}	64	83	86
		B	K2, K3	8	1	3	5	5
			K0, K5	5 ^{*1}	3 ^{*1}	10	21	14

* 1: Dimensions for STR2-M.

The reed switch cannot be used with STR2-B-6 or 10 types.

Combined functions
Twin rod cylinder

⚠ CAUTION

Installation & Adjustment

- 5** The cylinder may be damaged or may malfunction if a unit with excessive inertia, etc., is moved. Use within the allowable energy absorption range.
- 6** The twin rod cylinder has a 0 to -5 mm stroke adjustment bolt on the piston rod's return side. Loosen the hexagon nut and adjust to the required stroke. Then tighten the hexagon nut to prevent loosening.
- 7** Avoid using with the stopper bolt removed.

8 Precautions for fine speed type (STR2-F)

Adjust the alignment, etc., so lateral load is not applied to the cylinder.

Adjust and install so the sliding guide is not twisted.

- Operation may become unstable due to fluctuations in load and resistance.
- Operation of a guide having greatly different stationary and moving friction may become unstable.

- Bore size: 10, 16, 20, 25, 32 mm

JIS symbol

CAD DATA AVAILABLE.

Specifications

Descriptions		STR2-MF (slide bearing), STR2-BF (ball bearing)						
Bore size	mm	10 dia.	16 dia.	20 dia.	25 dia.	32 dia.		
Actuation	Double acting							
Working fluid	Compressed air							
Max. working pressure	MPa	0.70						
Min. working pressure	MPa	0.15		0.1				
Ambient temperature	°C	5 to 60						
Port size		M5			Rc1/8			
Stroke length tolerance	mm	0 to -5						
Working piston speed	mm/s	1 to 200						
Revolvable angle tolerance	STR2-MF	±0.3°			±0.2°			
	STR2-BF	±0.1°			±0.3°			
Piston rod	STR2-MF	Slide bearing						
Bearing type	STR2-BF	Ball bearing						
Cushion		Rubber cushion						
Lubrication		Must be oil free						
Allowable energy absorption	J	0.061	0.181	0.303	0.68	1.3		

- For 6 mm bore cylinder, we recommend fine speed type (STR2-0).

Stroke length

Model	Bore size (mm)	Standard stroke length (mm)	Max. stroke length (mm)
	10 dia.	10, 20, 30, 40, 50	50
STR2- _B ^M F	16, 20, 25, 32 dia.	10, 20, 30, 40, 50, 60, 70, 80, 90, 100	100

Switch specifications

- One color/bi-color indicator

Descriptions	Proximity 2 wire		Proximity 3 wire		Reed 2 wire	
	K2H/K2V	K2YH/K2YV	K3H/K3V	K3YH/K3YV	KOH/KOV	K5H/K5V
Applications	Programmable controller		Programmable controller, relay		Programmable controller, relay	Programmable controller, relay IC circuit (without indicator light), serial connection
Power voltage	-		DC10 to 28V		-	
Load voltage	DC10 to 30V		DC30V or less		DC12V/24V	AC110V
Load current	5 to 20mA (Note 1)		50mA or less		5 to 50mA	7 to 20mA
Light	LED (ON lighting)	Red/green LED (ON lighting)	LED (ON lighting)	Red/green LED (ON lighting)	LED (ON lighting)	-

Note 1: Max. load current above: 20mA is the value at 25 °C. When ambient temperature around a switch is higher than 25 °C, the value is lower than 20mA. (5 to 10mA at 60 °C).

- Equipped with preventive maintenance output

Descriptions	Proximity 3 wire		Proximity 4 wire		Proximity 3 wire		Proximity 4 wire	
	K2YFH/V	K3YFH/V	K2YMH/V	K3YMH/V	K2YMH/V	K3YMH/V	K2YMH/V	K3YMH/V
Applications	Programmable controller		Programmable controller, relay		Programmable controller		Programmable controller, relay	
Light	Installation position adjustment		Red/green LED (ON lighting)		Yellow LED (ON lighting)		-	
Preventive maintenance output	-		-		-		Yellow LED (ON lighting)	
Output	Current voltage		DC10 to 28V		-		DC10 to 28V	
	Load voltage		DC10 to 30V		DC10 to 30V		DC30V or less	
	Load current		DC5 to 20mA		DC50mA or less		DC5 to 20mA	
Preventive maintenance output	Load voltage		DC30V or less		-		DC50mA or less	
	Load current		DC20mA or less		DC50mA or less		DC5 to 20mA or less	

Dimensions

As same as double acting STR2 series. Refer to Page 1128.

Technical data

Refer to technical data (Page 741) about measuring methods.
